Martela

# Bobby

## Sit and stand table

Design — Iiro Viljanen

The height-adjustable Bobby table is the perfect side table when there is not much space. Thanks to its extensive height adjustment, you can work at the table when sitting or standing at both the office and at home. The tabletop's rounded corners and beveled edge add the final touches to the simple yet stylish design. Choose the model that is best suited for the space from two different sizes.
